Fall Dormancy: 4

Hybrid Highlights

- High resistance to stem nematode
- Set the standard for persistence and fast recovery after cutting
- Good overall plant disease resistance
- Multifoliate trait for very good forage quality

Trait

- Conv

Always follow grain marketing and IRM requirements and pesticide label directions. Agronomic characteristics and ratings may vary with growing conditions and environment. Ratings are approximate and should not be considered as absolute. Ratings on new products are based on limited data and may change as more data are collected. Extreme or variable conditions may adversely affect performance.
