

Set Your Sights on High Yield

Start bloom sprays with FOLI-GRO® POLISH®

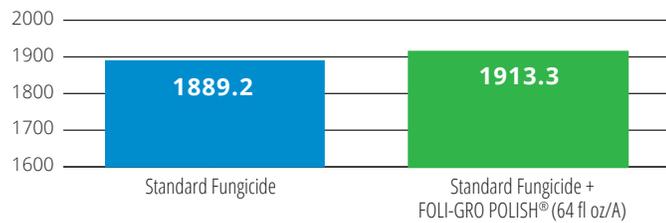

FOLI-GRO POLISH utilizes calcium, zinc, and nitrogen, combined with the complexing power of amino acids to maximize yield potential. This combination of nutrients reduces abiotic stress and helps almond trees keep up with nutrient demand at 20% bloom, full bloom, and petal fall, priming them for the season ahead.

MAXIMIZE YIELD WITH FOLI-GRO POLISH

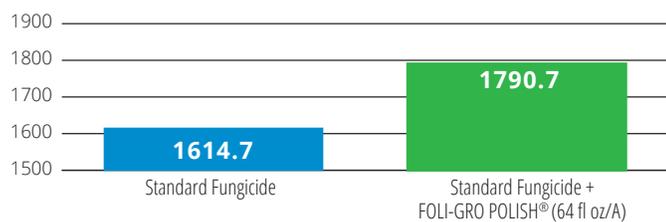

Data shows an average 12.9% yield increase over standard treatment.
