

Get Premium Potato Protection

Consistent, Proven Performance for Over 15 Years

NUBARK® GOLD is a unique formulation of Douglas and Alder bark, combined with 6% Mancozeb, made specifically for application on whole or cut potato tubers. NUBARK GOLD can aid in the control of Fusarium seed-piece decay and reduce the spread of phytophthora infestations during seed cutting operations. This proprietary blend of bark results in hydrophobic activity on cut seed surfaces while allowing for improved handling with less irritation.

Unique formulation
offers improved handling

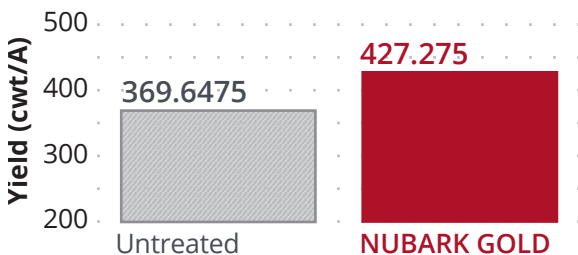

Alder and Douglas fir bark
are natural wound healers on
the cut seed-piece surface.

Complements your system
by helping seed-pieces dry
when used with liquid seed-
piece applications

Directions for Use:

Use 1 lb NUBARK GOLD Potato Seed Protectant Fungicide per 100 lbs of whole or cut potato seed-pieces. Apply so that the entire surface of the seed-piece is thoroughly covered by the fungicide. To avoid breakdown of seed-pieces, treat just prior to planting.
