

# Protect Your Potatoes with Alder Bark & Mancozeb

Potato Seed Treater AB is specially formulated with Alder bark and 6% Mancozeb, ideal for application on whole or cut potato tubers to aid the control of Fusarium seed-piece decay. Alder bark offers hydrophyllic activity on cut seed surfaces, while Potato Seed Treater AB's special formulation gives you improved handling.

**Unique formulation**  
offers improved handling

**Alder bark** is a natural  
wound healer on the cut  
seed-piece surface

**Complements your system**  
by helping seed-pieces dry  
when used with liquid seed-  
piece applications

## Directions for Use:

Use 1 lb Potato Seed Treater AB Seed Protectant Fungicide per 100 lbs of whole or cut potato seed-pieces. Apply so that the entire surface of the seed-piece is thoroughly covered by the fungicide. To avoid breakdown of seed-pieces, treat just prior to planting.
