

# An Organic-Approved Solution for Suberization

ProNatural<sup>®</sup> Suberization Aid is a unique blend of Douglas fir bark and proprietary drying and coating agents. This treatment has demonstrated excellent results in accelerating the drying down of cut seed-piece surfaces and may increase rate of suberization.

**For use in organic agriculture**  
(WA State Dept. of Agriculture)

**Douglas fir bark** is a natural wound healer on the cut seed-piece surface

**Complements your system** by helping seed-pieces dry when used with liquid seed-piece applications

## Directions for Use:

Use 1 lb ProNatural Suberization Aid per 100 lbs of whole or cut potato seed-pieces. Apply so that the entire surface of the seed-piece is thoroughly covered. To avoid breakdown of seed-pieces, treat just prior to planting.
