

PURIC® SALUTE® is PURE extracted, humic acid with compatibility in any liquid fertilizer blends. PURIC SALUTE is compatible with acids, bases, and calcium-based fertilizers to deliver an 8%\*(C DFA standards) humic acid through irrigation with any type of water or fertilizer. Advanced extraction and purification with PURIC technology. PURIC SALUTE can be blended with any liquid calcium fertilizer or acid-based fertilizer without staining the tank. Any application of CAN-17, CN-9®, INTELLIPHOS® or liquid fertilizer can be improved with PURIC SALUTE, especially during early fertilizer applications. Early and pre-plant liquid fertilizer applications through drip or broadcast.

**Features and Benefits:**

- Increased nutrient uptake
- Increased soil buffering capacity
- Increased root mass
- Improved soil water holding capacity
- Increased crop yield and/or quality
- Improved soil structure
- Increase soil pore space
- Increased soil microbial activity
- Increased CEC (Cation Exchange Capacity)
- Keeps nutrients where they belong

**Contains Non-Plant Food Ingredient:**

ACTIVE INGREDIENT:  
 8.00% ..... Humic Acids from Leonardite  
 INACTIVE INGREDIENTS:  
 92.00% ..... (Water, Potassium Hydroxide)  
 100.00%
