

# Protect Your Orchards

ALLOWANCE-EA™ Is designed specifically for air blast applications, and includes the newest technology for deposition and drift reduction. ALLOWANCE-EA can be used with most post-applied fungicide and/or insecticide applications to increase the amount of spray deposits, which leads to better coverage. Utilizing ALLOWANCE-EA in your spray program can also help diminish the risk of harm to sensitive and/or neighboring crops. ALLOWANCE-EA provides a more uniform spray pattern, maximizing the deposition of the spray material while minimizing the amount of drift-able fines.

**Better Coverage =  
Better Performance**

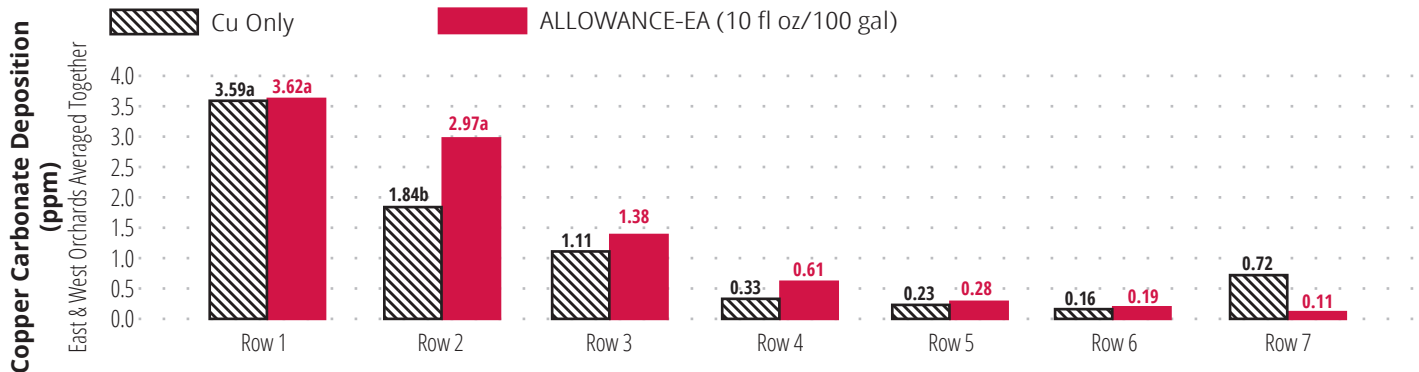

**Non-Oil, Water-Based  
Formulation**

**More Droplets, Better Deposits,  
More Product on Target**

## Keep Your Products Where You Want Them – On the Crop

100 GPA | Means followed by same letter do not significantly differ.

If graph contains multiple bars/lines, means from different evaluations (different colored vertical bars or different points on a line) do not correspond. (Non-Nutrition/Biological: P=.05, Nutrition/Biological: P=.10, LSD). If no letters are present, there is no significant difference.
