

Effectiveness—it's the only conventional thing about it.
The sustainable, organic adjuvant that works.

INFOLIUM-EA™

INFOLIUM-EA is an effective, nonionic surfactant approved for use with organic pesticide applications.*

A surfactant's job is to improve spray efficacy and the performance of herbicide and other pesticide applications. INFOLIUM-EA is specifically formulated to go beyond standard surfactants to help pesticides perform better by more uniformly distributing the tank-mixed product and increasing the active ingredients' penetration into the leaf tissue.

HOW INFOLIUM-EA IMPROVES WEED AND PEST CONTROL:

- Promotes quick wetting and spreading to produce a more uniform spray deposit
- Reduces surface tension between the active ingredient spray droplets and the plant cuticle
- Increases absorption of the product
- Efficiently moves the active ingredient into the water channels of the leaf

ADVANTAGE FOR ORGANIC GROWERS:

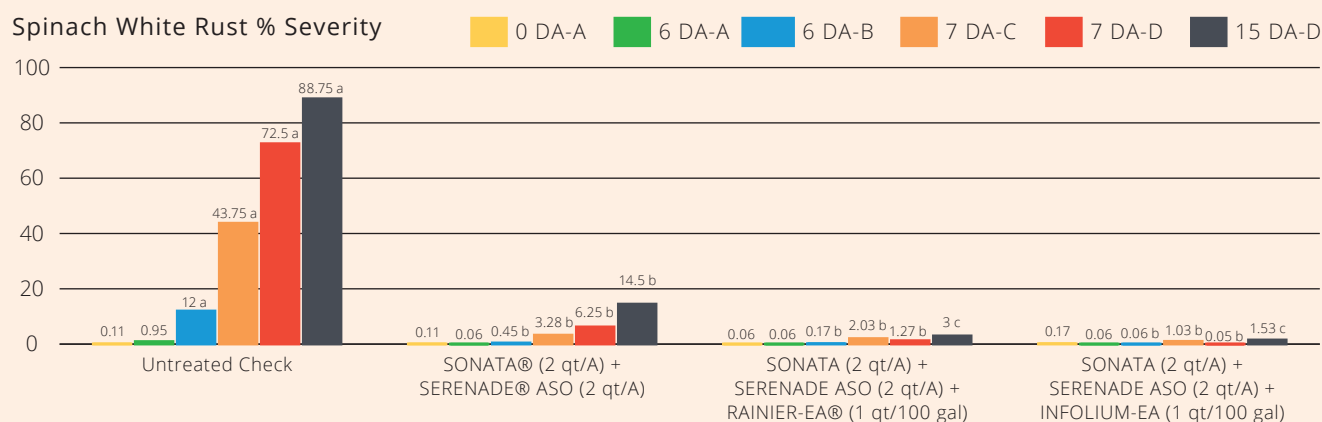

Organic growers have a high-quality, high-performing, consistent, and reliable surfactant choice with INFOLIUM-EA. It is a unique, patented technology that is OMRI-certified, safe to use, environmentally friendly, and efficacious.

*INFOLIUM-EA may also be used with conventional pesticides.

RATES AND APPLICATION

INFOLIUM-EA can be tank-mixed and used for application to crops and other sites, including aquatic, non-crop vegetation, turf, and ornamental. Follow the rates and application recommendations as shown for nonionic surfactants on the pesticide label.

USE	RATE
Aquatic	0.25-0.5% v/v of total spray mixture
Fungicides, Insecticides, Miticides	2-32 fl oz per 100 gal spray mixture
Herbicides	6-48 fl oz per 100 gal spray mixture
Turf & Ornamental	2-32 fl oz per 100 gal spray mixture
Backpack/Handheld Sprayers	1-2 tbsp (½-1 fl oz) per 1 gal spray mixture
