

When sulfur's in its element, it delivers.
When it's wired, it delivers even more.

TILL-IT® WIRED™ SULFUR

TILL-IT WIRED SULFUR provides essential sulfur and enhances the rhizosphere at the same time with extracted, available humic carbon material.

Your plants' sulfur needs increase each year as air pollution (and the sulfur it produces) decreases. A high-quality pastille of elemental sulfur (85%) and humic carbon (2%), TILL-IT WIRED SULFUR is designed to deliver and disperse sulfur through banded and broadcast applications with dry fertilizers or soil amendments. It helps feed the rhizosphere — the soil zone that provides plant roots with critical water and nutrients.

GUARANTEED ANALYSIS:

Sulfur (S).....85.00%
DERIVED FROM: Elemental Sulfur.

ALSO CONTAINS NON-PLANT FOOD INGREDIENT:

2.00% humic acids derived from oxidized sub-bituminous coals.

THIS ELEMENTAL SULFUR PRODUCT IS WIRED WITH NUTRIENT EFFICIENCY:

- Contains PURIC® carbon technology, which increases nutrient uptake, root mass, soil buffering capacity, water holding capacity, and, most importantly, potential yield
- Immediate activation with water and water-soluble, extracted carbon
- Increases porosity of soil and improves the soil structure. Plants retain all of the oxygen, water, and nutrients needed
- Helps correct pH in alkaline soils
- Produces gypsum in calcareous soils that further improve soil porosity and structure
- Provides season-long sulfur by converting elemental sulfur to plant-available sulfate.

SULFUR IS REQUIRED TO METABOLIZE NITROGEN AND TRANSFER SUNLIGHT ENERGY INTO PLANT GROWTH.

RATES AND APPLICATION

Follow the rates and application recommendations as shown.

USE	RATE
Dormancy or postharvest soil amendment, preplant broadcast, or band is preferred	100-1000 lb/A, depending on sulfur and pH levels (carbon will hold more nutrients in the band, sulfur frees up calcium)
