Consistent Performance to Maximize Your Spray

Alleviate the Antagonistic Effects of Hard Water

- · Water Conditioner, Volatility Reduction Agent, and Drift Reduction
- No Ammonium Sulfate

VOLIFLEX™ TRI is a multi-functional adjuvant containing a water conditioner, volatility reduction agent, and drift reduction agent without ammonium sulfate. The water conditioner in VOLIFLEX TRI allows for maximum efficiency of your chosen pesticide by taking the edge off the antagonistic effects of hard water mineral ions such as calcium, iron, and magnesium. VOLIFLEX TRI provides protection against volatilization of the applied herbicides utilizing a novel Vapor Reduction Agent (VRA), VaporGrip® technology that works to minimize the chance of any vapors leaving the field after a spray application event.

RATE RECOMMENDATIONS

For use with Engenia®, Tavium®, and/or XtendiMax®: 1.56 gallons of VOLIFLEX TRI per 100 gallons of spray solution.

VOLIFLEX TRI BENEFITS

Protection against herbicide volatility

Alleviates antagonistic effects of hard water

Improved herbicide efficacy

Effectively reduces driftable fines during spray application

	Minimum DRA/VRA Rate at	
Herbicide	15 gpa spray volume	20 gpa spray volume
Engenia® Herbicide	1.56% v/v (30 fl oz/A)	1.56% v/v (40 fl oz/A)
Tavium® Plus VaporGrip® Technology	1.56% v/v (30 fl oz/A)	1.56% v/v (40 fl oz/A)
XtendiMax® with VaporGrip® Technology	1.56% v/v (30 fl oz/A)	1.56% v/v (40 fl oz/A)

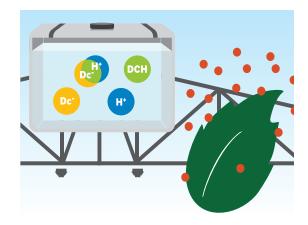

HOW VAPORGRIP® TECHNOLOGY WORKS

Dicamba without VaporGrip® Technology

In the tank there is the potential for dicamba acid (DCH) to form in solution and create off-target movement of dicamba through volatility after spraying

VOLIFLEX TRI with VaporGrip® Technology

In the tank, VaporGrip® Technology reduces the formation of dicamba acid (DCH) in solution, minimizing volatility potential of dicamba after spraying
