

DON'T JUST SPRAY THE FIELD. HIT THE TARGET.

ALLEVIATE® is a premium adjuvant system designed to eliminate the variables between the nozzle and the site of action. It protects your chemistry from drift and evaporation, ensures uniform leaf and canopy coverage, and drives the active ingredient through the toughest waxy cuticles.

OPTIMIZED DROPLET SPECTRUM

An oil-emulsion-based DRA that minimizes driftable fines while maintaining an ideal droplet size for deep canopy penetration and uniform deposition.

OPTIMIZED DROPLET SPECTRUM & MAXIMIZED DEPOSITION

NPE-FREE SPREADING

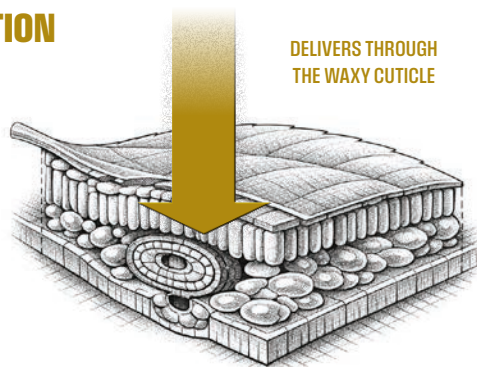

A superior, environmentally conscious nonionic surfactant (NIS) that ensures the product flattens and adheres to the leaf surface immediately upon contact.

SUPERIOR SURFACE COVERAGE

ENHANCED CUTICLE PENETRATION

Utilizing a high-performance MSO base, ALLEVIATE aggressively moves the pesticide through the plant's outer waxy layer, ensuring faster uptake and better efficacy in stressed conditions.

DELIVERS THROUGH THE WAXY CUTICLE

ALLEVIATE FUNCTIONS

Penetrant

Drift Control Agent

Deposition Aid

Nonionic Surfactant
