

IN-SEASON NEMATODE DEFENSE

Designed for use in soybean, corn, cotton, and other row crops. ATALIOL™ activates systemic plant defense signaling to protect roots from plant-parasitic nematodes. Applied during in-season spray passes, it provides a flexible nematode management option that complements seed treatments and supports yield stability under nematode and drought stress.

ATALIOL HELPS FORM A BARRIER

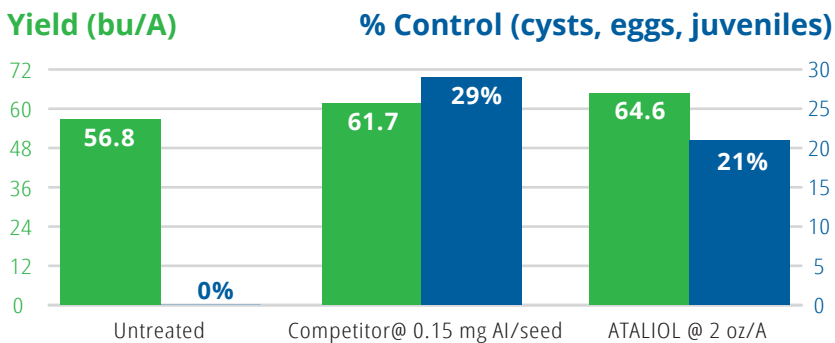

GENERATED IMAGERY FOR ILLUSTRATIVE PURPOSES ONLY.

Untreated:
Cell walls remain thinner and more permeable, allowing easier entry and damage.

After ATALIOL treatment:
Cell walls are thickened and reinforced with lignin and callose, forming a stronger barrier that makes penetration more difficult.

YIELD AND NEMATODE CONTROL SOYBEANS

Trial ID: PHC68949

Multi-site, multi-year trials (2019–2025)

ATALIOL BENEFITS

Foliar, in-season nematode management

Systemic activation from leaf to root

Reduces nematode feeding and reproduction

Strengthens root function under drought stress

USE RATES & TIMING

| CROP | RATE | TIMING |
|----------------|----------|--|
| Soybean | 1–2 oz/A | VC–V6; Tank-mix with 1st post herbicide |
| Cotton | 1–2 oz/A | Early season (V3–V4) |
| Potato | 1–2 oz/A | Early emergence; repeat every 21–28 days |
| Corn | 1 oz/A | V2 application |
